

Lake Forest Glen Approved Plants

The following is a list of HOA-approved plants that seem to do well in our area. Please be advised that different factors will affect the ability of different plants to thrive in your specific location (which direction unit is facing, sun exposure, etc.). If you need additional irrigation lines installed, please contact the HOA office. Junipers and any trees are prohibited.

Clicking on the name of the plant will link you to a webpage showing images of that plant in Google. It is also recommended that you search the plant names online (or consult a local nursery) for more information on the specifics of the plant to find out about sun and soil requirements, growth and spreading habits, insect attraction or resistance, watering needs, etc.

BULBS

[Daffodil](#)

[Iris](#)

[Lilies](#)
